The following is an Examiner's Statement of Reasons for Allowance: The Prior Art of Record teaches output voltage regulated circuits, such as Tzeng (4,390,833), wherein NMOS transistors are utilized and PMOS and bipolar PNP devices are devoid from the design. However, there does not appear to be strong motivation for including an NMOS blocking transistor (esp. as connected with the NMOS voltage regulator output transistor) as required by the Independent Claims 7, 17 and 20. The Prior Art of Record also teaches reverse supply voltage protection schemes, such as, Elliott et al. (5,012,381), wherein NMOS transistors are utilized and PMOS and bipolar PNP devices are devoid from the design. However, there does not appear to be strong motivation to alter the design so as to incorporate a voltage regulated output node at a desired regulation point, as it appears that such an alteration would detrimentally affect the designed normal operation of the circuit. Therefore, it is the opinion of the Examiner that the Independent Claims 7, 17 and 20 are considered to be novel and unobvious in view of the Prior Art of Record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald W. Leja whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571)272-2800. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
